
smoking, handicap accessible...

Posted by pmoore - 2007/09/23 00:56

I think your component looks great, a little high in price however in my opinion. But anyway, I think a big option missing is smoking and non-smoking choice, as well as handicap accessible tables.

I would like to take this to a client but wouldn't even think of it until these types of options were available. I also like the idea of the directory options (multiple-restaurant bookings). I think you'd be more justified in what you're asking for the component.

Please don't take offense to my opinion, I think you're really on to something, and again, it looks awesome.

P
