## Adding new mealtimes?

Posted by chris - 2007/12/01 07:39

---

Hi there, nice looking product...

Our restaurant has a brunch service on Sundays and a breakfast service on Saturdays, as well as Lunch/Dinner on all days... is there any way to accomodate these special mealtimes, or do you have plans to add support for this functionality?

Thanks,

Chris .\|

Hi and thanks!

Sorry it took so long to respond... :blush:

Currently TableBoss can be configured for up to 2 meals in any given day, and the names chosen for the meals are universal so it is not possible to call it brunch on Sundays for example and Lunch on Monday.

We will add more configuration in that area depending on customer demand we receive.

Yes! This is needed! Please add this feature ASAP or else this product is no use to me.

Is this feature coming any time soon or do I need to try to implement it myself. If you could give me a quick intro that would be really handy.
