
Selling Tickets/Seats for Comedy Club

Posted by Brian Stephens - 2007/12/06 05:31

I have been asked by a comedy club client to put together a Joomla solution that would allow them to sell tickets for shows and allows patrons pick (reserve) their seats at the same time (in the same app). Is there an easy way to integrate TableBoss with a shopping cart like VirtueMart?

Hi Brian,

Sorry it took a while to respond to you. We have been busy getting our latest release out the door.

The Wizard now can be configured to require a payment at the time the reservation is requested via Paypal. This does not require the customer to have a Paypal account.

Please let me know if you would like more information.

Best Regards

=====
