## Release 2.1.0 Available

Posted by mfabrizio - 2007/12/18 20:39

---

The new version contains many new features and improved performance.

Most notably the reservation wizard can be configured to optionally require a payment transaction, as well as the addition of a powerful new reporting module. The reporting module comes with some key report types, standard time interval options and the ability to export them into XLS or CSV format.

For limited time, new customers can save 40% (\$100.00) from the initial purchase price during our Holiday Sale!

Optional Reservation Wizard Paypal step to charge for a reservation  
Permission Based Reports to review Reservation and Diner Information  
Configurable Buffer allows restaurant to set time till next reservation in the reservation wizard  
Customer Cancellation Link
