
Step 2: Day and Date

Posted by Zaheer - 2008/02/05 18:55

Hi

I have installed this application but the only problem I have is at step 2, it will not display the calendar, instead it displays a drop down with the dates. I tried both browsers, IE and Firefox.

Thanks in advance
Kind Regards
Zaheer

Hi Zaheer,

The options for the party size (plus/minus) and 'Calendar' Options are not available in the released version 2.1.2. They are in the Pre-Release version 2.1.3 which is available from the downloads area. We are in final stages of qualifying this for release - hopefully today.... If you aren't in a hurry I would just wait to download the Released version 2.1.3 as we have fixed many small issues.

Best Regards,

Thanks mate for the quick response

I will await the latest release.
