
How many restaurants can I save?

Posted by Joe - 2007/10/01 00:01

Hi All. How many restaurants can I save in Tableboss? Or is it just for one restaurant? Thanks in advance and best regards. joe

Hi Joe,

At this time, only one restaurant per TableBoss installation.

Is there a way to do a second installation in the same Joomla site?

Hi dbreck,

You can only install one instance of TableBOSS per Joomla! installation.

Really? You couldn't just point everything to new folders and table names, then install a second time? It's beyond me to do that, but it seems like it would be a possibility, and a really handy one at that.

Hi dbreck,

I think we may have misunderstood your question. We are working on an upgrade path that should suit multiple rooms in a restaurant. But in the meantime, you are welcome to edit the code as you described if both restaurants reside on the same url.

Best Regards-
Mark

When do you expect a multi-room/restaurant functionality to be in place for Tableboss? Many restaurants have more than one dining room, many venues have more than one restaurant and many companies have more than one venue.

Give the price of TableBoss I am surprised this functionality is lacking.

Also Dbreck - did you get a multi-install working? If so could you share with me how?

Many thanks.
