
Tableboss plugin for SEF

Posted by buyweb - 2008/05/13 14:22

Hi,
i have a question, do you have a plugine for tableboss
for Search Engine Friendly?
I really hope you have.
Thanks
Silvia

Hi Silvia-

We do not have a plugin file for SEF Urls. However, there are only two public URLs. In most SEF Components, you could manually add an entry for each of these.

Best Regards-
Mark

Hi Mark,
i did that and it works fine, the only problem is the URL sent in the e-mail for the confermation and cancellation
resevation.
Do you know how to resolve the problem?
Thanks
Silvia

Hi Silvia-

These links are processed through the SEF engine, but each link is different
(different confirmation codes, reservation IDs, etc.) I am not aware of any SEF components that can handle processing
only part of a url without a plugin file.

What SEF component are you using?

Best Regards-
Mark

Hi Mark,
i am using sh404SEF on joomla 1.0.15
that component is working great!! The only problem is that the link on the e-mails sent by tableboss system repeat just
the first confermation always.
Bye

Silvia

I will look into providing a plugin file for sh404SEF.

Is the link working correctly?

Regards-
Mark

I updated the 2.1.4 build with an sh404SEF plugin file. This should translate the Cancel and Validate links.

It is available in the downloads area.

Best Regards-
Mark

Hi Mark,

i tried yestarday , i downloaded and upgrade my version, but still the system recognize only the first url (i've tried with the link for the confermation in the email)The others e-mail was always the same link of the same resevation.

Thanks

Silvia
