
Blank Screen on Install Issue

Posted by fabrizim - 2008/09/24 03:33

Hi All-

I have found a bug in the JPlus dependency which may cause the blank screen as described above. I updated the package, so if you are still having this problem, please visit the Downloads page and download the JPlus package again. Uninstall that package from your current joomla installation and then reinstall the new package.

Hopefully this should resolve this issue - if not, please send login credentials to support@tableboss.com and we can take a look at what is going on.

Best Regards-
Mark
