
Change color in Floor Plan in Line and Text

Posted by Mauricio - 2010/04/26 12:15

Good day Mark, sour their invaluable help, again ask for your support.

We make the following changes.

1. The Floor Plan / List of Reservations

wish to change the background color (background line and color of text)
in the Internet Explorer browser is blank and Mozila appears in red, we would like to standardize this.

2. Deseamos switch the report to Excel.

how we can change that generates the report as a single page excel
if we select April 1 to April 30 show in one page in this report and various internal pages.

thanking them for their valuable assistance
and waiting for your prompt response.

atte.
Mauricio

Hi-

The background color can be handled with CSS - you would need to add a rule to your templates stylesheet for the elements that need their background changed. You could add something like to this to try and change the background on the whole area:

```
#tb-mainarea{ background-color: #fff; }
```

In order to get the Excel reports on a single page, you will need to modify the code for the specific report. Check components/com_tableboss/classes/tableboss/report/type/reservations.php.

Best Regards-
Mark
