
resserva can only stay for lunch, not dinner

Posted by ansiar1 - 2010/05/12 04:20

Good day Tableboss use in a restaurant, when someone comes to make a resserva can only stay for lunch, not dinner option appears. Obviously, I have enabled in the configuration dinner with their schedules right from the administrator if it works, but from the frontend does not work. Can you help?

This is the page where it does not work

<http://www.thaimos.es>

Thank,

Antonio

Hello,

Go into your TableBoss Administrator and check the Configuration for Hours and make sure "Open for Dinner" is "Yes".

Otherwise, send admin access via email to support@tableboss.com and I will take a look.

Thanks and Regards.

Yes, I have since there will be at dinner from 20:30 to 00:30. From Monday to Saturday.

The problem comes because if I put the closing time of any day is over 0000, that is to say that can be done until 0030, the module no longer left in the frontend I see the times for dinner. Do you test. I have configured: WIZARD TIME FORMAT: H: i

Could you tell me how I can solve my problem, my client is getting fast and I have to give a solution.

Thank you very much.

The hours must be in the same day. I am sorry but this a restriction in TableBoss.
